OBJECTIVE

Experienced network engineer with over 10 years in the field, specializing in deploying and managing network technologies. Ready to leverage expertise to contribute effectively to your organization's objectives.

EXPERIENCE

Senior Network Engineer - Stream Net Co.,Ltd

Nov/2021 – Apr/2024

- Ensured compliance with service level agreements, managing initial response, resolution, and communication processes with the escalation of critical issues as necessary.
- Led the planning, implementation, and maintenance of Core infrastructure according to best practices, including routers, switches, Wi-Fi, firewalls, servers, etc.
- Managed system backups and network protocols.
- Collaborated with vendors, partners, and external experts to stay up-to-date with emerging threats and industry trends.
- Identified operational or technical gaps and proposed improvements in operational processes.
- Documented network configurations, processes, and procedures to ensure clarity and consistency across all client sites.

Senior Network Engineer – Horizon Telecom International Co.,Ltd

Sep/2018 – Nov/2021

- Monitored the network's performance, availability, and reliability using third-party applications such as Cacti, Nagios, LibreNMS, PRTG, and Smokeping.
- Provided technical support and diagnosed problems through onsite or remote troubleshooting.
- Collaborated with cross-functional teams to identify network requirements for new projects and initiatives and provided technical guidance throughout their lifecycle.
- Implemented network infrastructure tailored to the organization's specific requirements.
- Implemented network backups operations to ensure data recoverability and business continuity.
- Monitored, assessed, scheduled, and implemented network and product-specific security vulnerability patches.
- Maintained network documentation, including Standard Operating Procedures (SOPs, HLD, LLD), and work processes.

Network Engineer – Frontiir Co.,Ltd

Aug/2014 – Sep/2018

- Performed hardening, upgrade, and enhancement on Core infrastructure components.
- Assisted in technical communications with customers/partners to ensure the closure of sales orders.
- Participated in network implementation projects and initiatives.
- Handled maintaining network software, ensuring seamless connectivity, and efficient data transfer.
- Worked closely with operations teams in day-to-day activities.
- Troubleshooted and resolved issues promptly, including diagnosing hardware and software problems, identifying network glitches, and minimizing downtime.

EDUCATION

- **Bachelor of Computer Science** - University of Computer Studies, Mandalay

May/2010 – May/2014

CERTIFICATES

- CCNA
- JNCIA
- JNCIS – Service Provider

PROJECTS

Metro Transmission Network - 200G Capacity Implementation Project

- Configured OSPF, BFD, MPLS, VRF and BGP on Huawei Net Engine 8000 Series Routers.
- Main Provider Edge Routers run as BGP Route Reflectors and Service Provide Edge Routers run as Clients.
- Configured MPLS L2VPN (P2P and P2MP).
- Configured QinQ to carry user VLANs with service VLANs.
- Configured Carrier Grade NAT on Thunderbolt A10 for NAT.

TECHNICAL SKILLS

- TCP/IP, OSI 7 Layers, PBR, EIGRP, OSPF, IS-IS and BGP.
- DMVPN, VxLAN, MPLS, GRE Tunnel and IPSec.
- VLAN, STP, VTP, HSRP, QinQ, 802.1Q, Etherchannel, VSS and Stack-Wise Virtual, QoS, Wireless, SDN and SD-WAN.
- Cisco ASR 9K, Nexus, ASA Firewall, Huawei Router and Switch, Thunderbolt A10, FortiGate, Edge Router, Juniper MX and EX Series, Mikrotik and Extreme.

SOFT SKILLS

- Leadership skill
- Problem solving skill
- Active working under the pressure
- Social skill
- Self-learning

AWARDS

- Result-Orientation Award for deploying new service delivery project to meet the coverage area.

EXPECTED SALARY

- SGD 4,000 (Nego)

NOTICE PERIOD

- Immediately Available
